

Apps to help you to identify leaves, trees, flowers and birds. These Apps can be great to use on your GM Daily Mile walk

1) British Trees – by the Woodland Trust

What's that leaf? What kind of tree is that? Is it a native species? These are all questions that can be answered in this fantastic app by The Woodland Trust. It is easy to use and includes plenty of information on different species of tree. You can identify trees by their features such as leaves, branches or fruit, or you can browse through an A-Z of British trees. The app allows you to save your 'favourite' trees, and also tells you about their features and threats they face. **Cost: Free**

2) Birdtrack – by British Trust for Ornithology

This app allows users to log sightings of birds and create lists of species they have seen. Once you have logged in, you can see other local spots by birders near to you, helping you track down any species you haven't yet spotted! **Cost: Free**

3) Nature Finder – by The Wildlife Trusts

Only available on the app store:

The Wildlife Trusts have produced an app that showcases all their locations across the UK – perfect for planning a quick wildlife getaway! Once you've selected a destination, the app will tell you about the kinds of wildlife you'd expect to find there and why it lives in that location. There is also information on more than 900 UK species and habitats, at your fingertips. If you're keen to get more involved, you can see upcoming events near you to join in with too.

Cost: Free
